

MAXI PAN

Adaptation pan for piglets in weaning phase

The **Maxi Pan** is a bowl to temporarily dispense starter feed to newly weaned piglets. An increase in feeding spaces during the first few days after weaning piglets improves their adaptation to feed and makes them grow more quickly and homogeneously. Without a doubt the best selling pan in the world.

FEATURES

- Circular concave rimmed dish with no corners that animals cannot reach.
- No rivets or gaps in connections between pieces.
- Watertight plastic pan.
- Separators to stop animals from getting inside.
- Hook attachment system operated with one hand.
- Standard model compatible with grilles with openings from 10 to 14 mm wide and more than 31 mm long.
- Concrete models compatible with gratings with openings from 10 to 60 mm wide and more than 120 mm long, with ribs up to 110 or 130 mm.

ADVANTAGES

- Maximizes consumption while minimizing waste.
- Easy to clean.
- Circular design with multiple feeding spaces and warm touch increases the number of animals that use it.
- Can be used to dispense liquids and gruel.
- Quick and easy fastening to any type of metal gridded, plastic or concrete floor.

MAXI PAN

PRODUCT ACCESSORIES

SET FOR MAXI HOPPER PAN

The **Maxi Hopper Pan kit** includes a tank that is adapted to the Maxi Pan to increase storage capacity.

Features:

- High capacity hopper with gradual height adjustment system.
- Injected with translucent polypropylene with anti-UV protection.
- Optional extender and watertight cover.
- System for fastening to dish mast in order to rotate the hopper.

Advantages:

- Capacity for several days, reducing the labour required to dispense feed.
- Feed flow adjustable at high precision to feed particle size.
- Easy to check tank content.
- Robust and durable.
- Hopper movement significantly facilitates feed flow.
- Easy cleaning.

MAXI PAN

PRODUCT ACCESSORIES

MAXI HOPPER PAN EXTENSION AND LID

Supplement to increase its capacity up to 60L.

Advantages:

- Hopper extension injected with translucent polypropylene with anti-UV protection.
- Easy disassembly without screws for complete cleaning.
- LID avoids losses of feed aroma and prevents the entry of humidity and dirt.
- Possibility of installing an automatic conveyor with a perfect adjustment, both in vertical and inclined fall.
